

MyGenom: Keselamatan & Perlindungan Data

Data daripada projek MyGenom akan disimpan dengan selamat menggunakan langkah-langkah keselamatan yang kukuh untuk melindungi kerahsiaan serta memastikan integriti maklumat yang disimpan. Data ini disimpan di dalam pangkalan data di premis dan *cloud* bagi memastikan keselamatan dan perlindungan data terjamin.

Data yang diambil

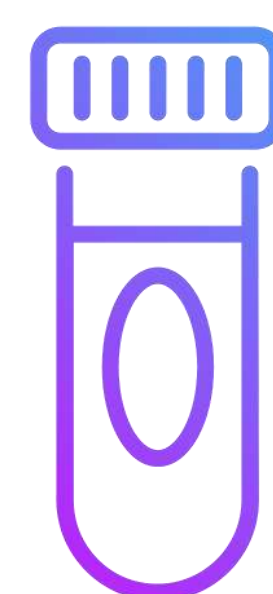

Soal Selidik

Tinjauan mengenai demografi, sejarah perubatan & keluarga serta gaya hidup

Data Klinikal

Keputusan makmal daripada ujian darah klinikal.

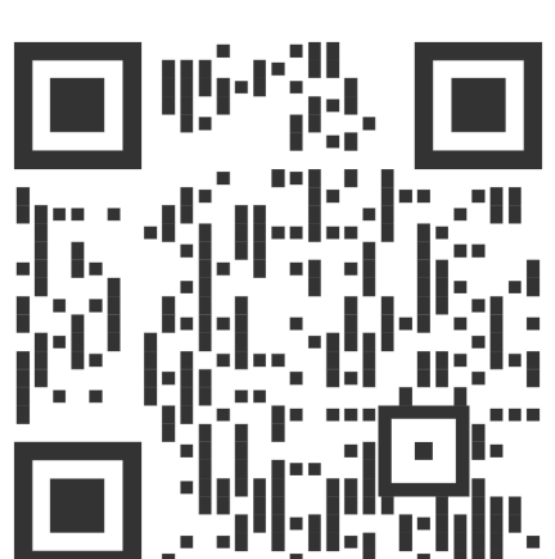

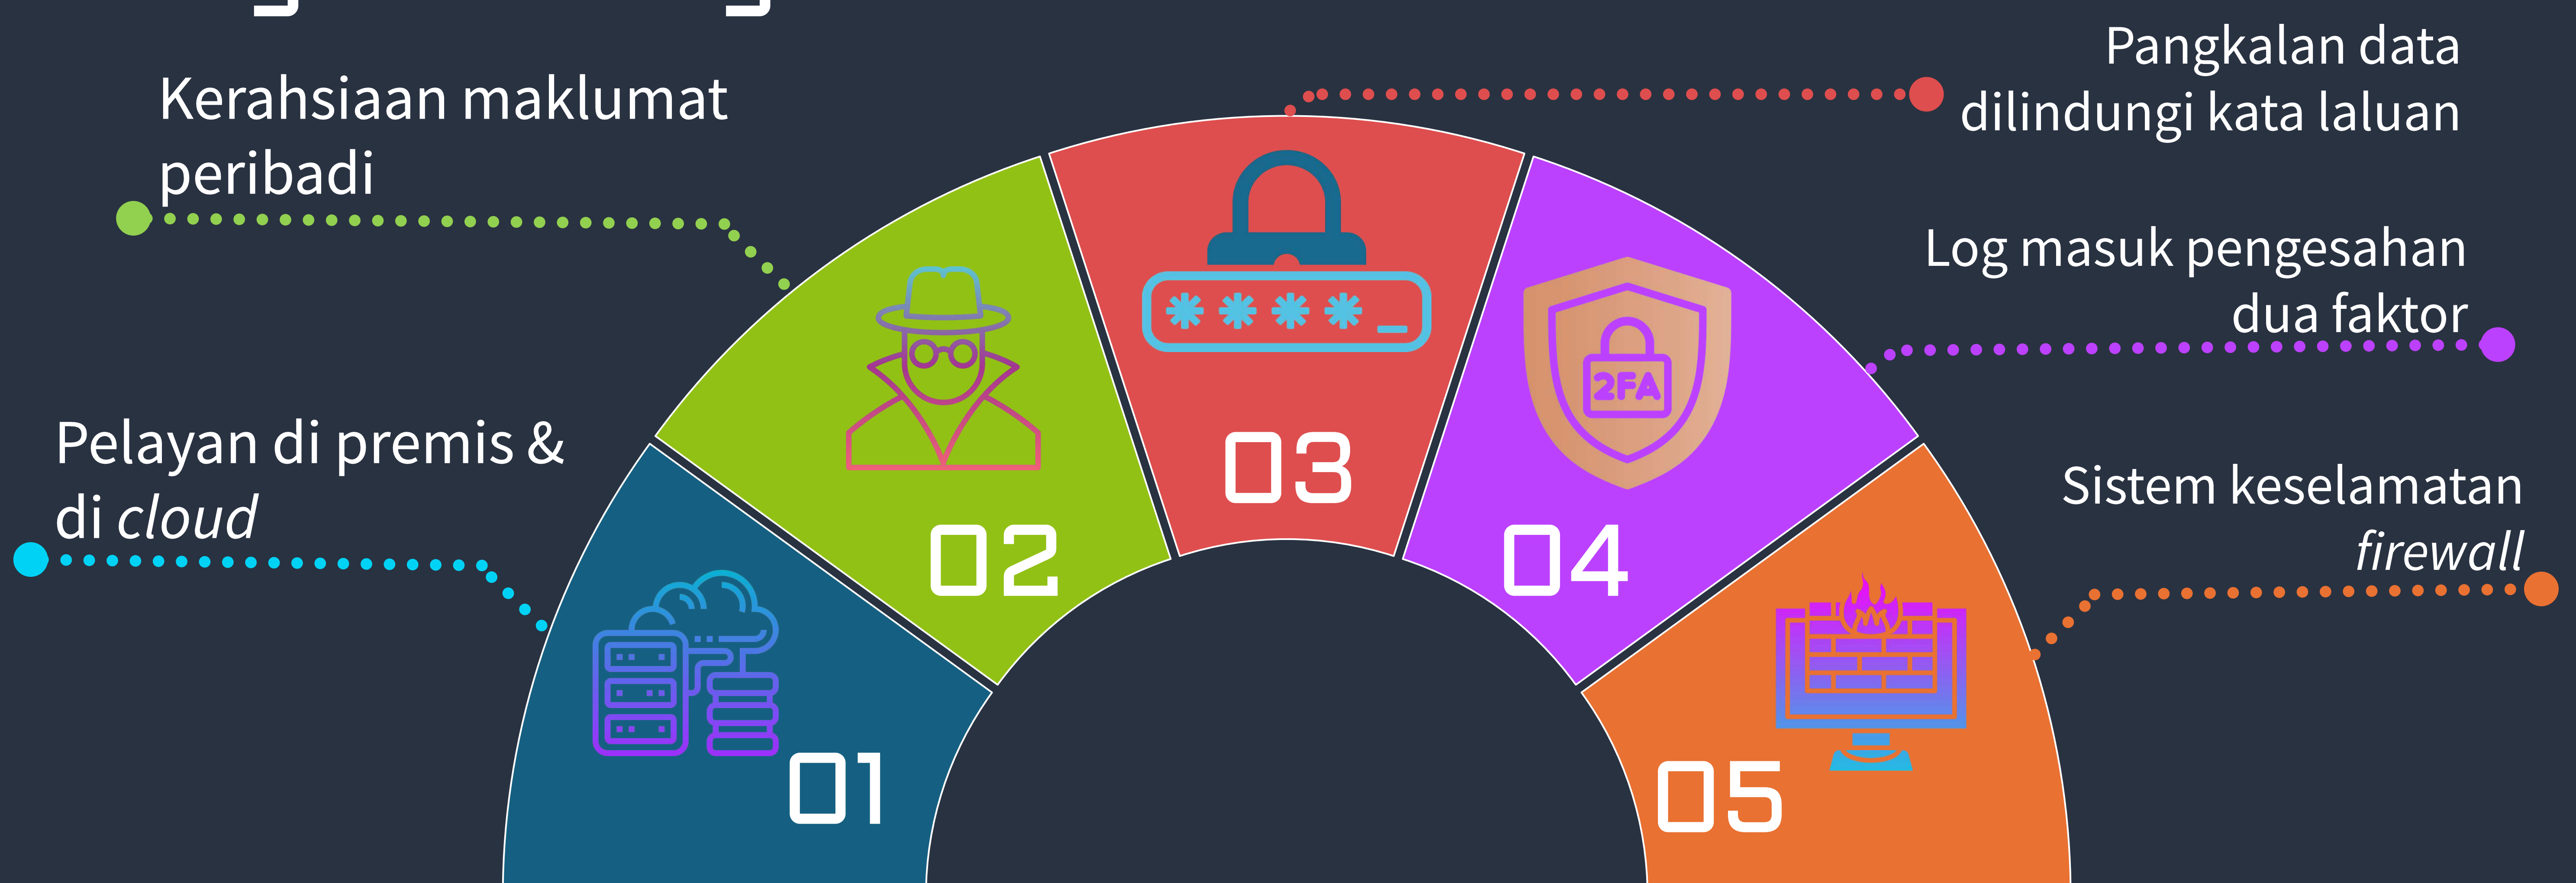

Jujukan DNA

Maklumat genetik lengkap hasil daripada penjujukan DNA sampel darah.

Langkah-langkah keselamatan

MyGenom:●

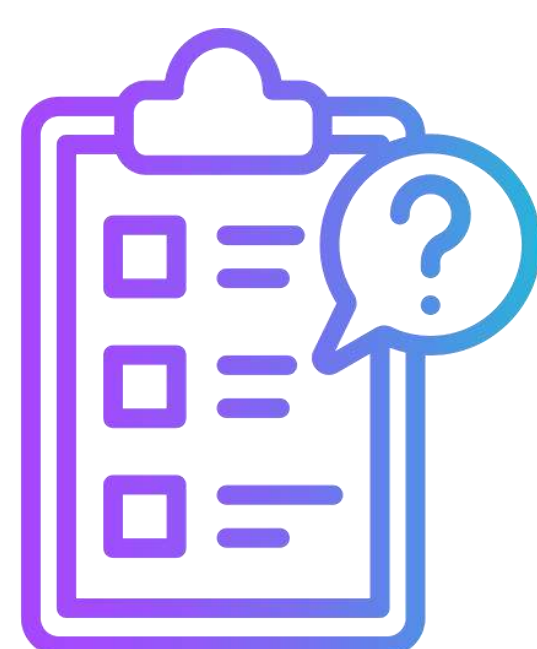

Data Security & Safety

Data from the MyGenom project will be kept safe with strong security measures to protect privacy and ensure data integrity. This data will be stored in an on-premise database & cloud, further enhancing its safety and security.

Collected Data●

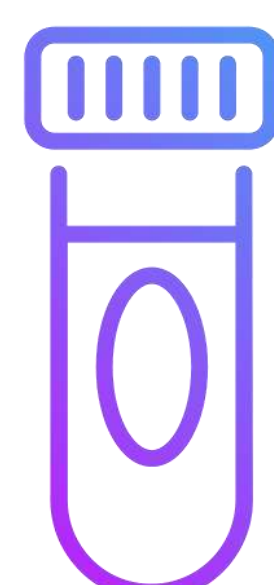

Questionnaire

Surveys about participant's demographic, medical & family history and lifestyle.

Clinical Data

Laboratory results from standard clinical blood tests.

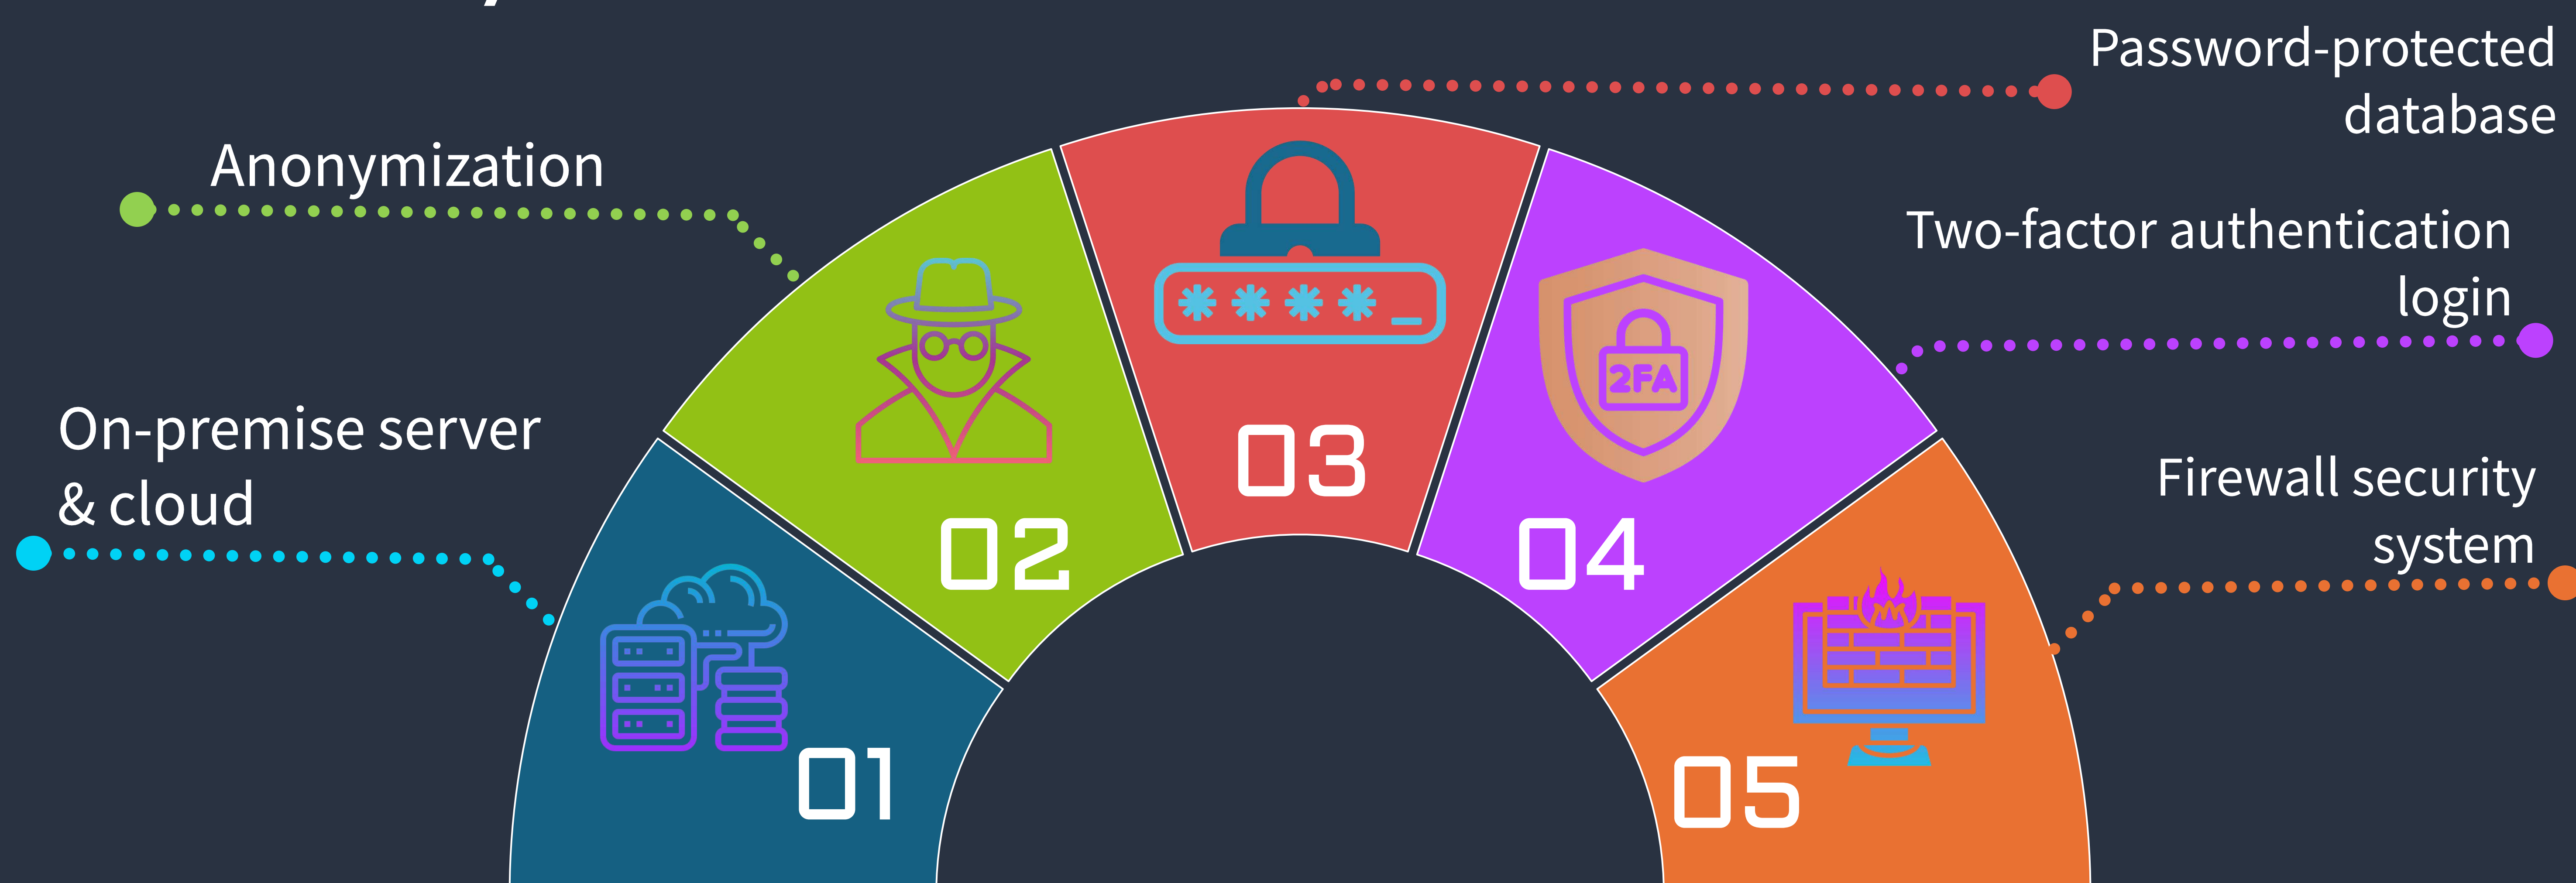

DNA Sequence

Complete genetic information derived from blood samples.

Security Measures●
